

tbCOMPASS

Ambidextrous Treatment Centres

Ambidextrous delivery options :

for better daily dentistry :

tbCOMPASS

From an elegant, slim base-mounted arm comes a responsiveness which ensures Operators achieve comfortable working positions.

tbCOMPASS

Unrivalled console mobility and tbCompass's determined versatility bring all the benefits of convenience, flexibility, efficiency and Patient comfort.

Belmont's base-mounted delivery system design is an understated advancement in dentistry and Patient care.

Ambidextrous capability across the range doubles the qualification of tbCompass in any configuration to perform excellent service for any Operator and procedure.

tbCompass 'Surgery System' (Ambidextrous)

tbCompass 'Flexible Dr System' (Ambidextrous) chair and Operator's console

tbCompass 'Flexible Cuspidor System' (Ambidextrous) chair and cuspidor with Assistant's console

tbCompass 'SURGERY SYSTEM'

900 LED chair-mounted Operating Light

Control and discretion are the finest traits of the tbCompass delivery system. An intelligent delivery solution which seeks to conceal the instruments from Patient-view without comprising working comfort. Designed for uninterrupted dentistry in the most demanding surgery environments, tbCompass is pointing to the future.

Increased surgery efficiency & Patient access :

Base-mounted swing-arm delivery system provides the full range of Operator access

To improve efficiency and increase workflow are the key aims of the tbCompass treatment centre. Sheer mobility enables simultaneous tasks to be carried out, thus saving the Patient and surgery time.

PATIENT ACCESS

Operator's console poses zero-obstruction to Patient entry offering unusually welcoming access to the chair.

Positioning the Operator's console behind the chair, and instruments out of the Patient's view, makes a huge contribution to reduced Patient anxiety.

comfort for all Dentists & Patients :

tbCOMPASS

Correct ergonomics and smooth movements ensure that tbCompass is a pleasure to work with at any position.

tbCompass 'SURGERY SYSTEM'

Extensive access for Assistants working at 2-5 o'clock

Simultaneous preparation and consultation saves valuable working time between every Patient. The uniquely perfect clean and preparation arrangement to the rear of the chair also improves lines of communication between Operator and Assistant.

Comfortable single- and four-handed working positions with excellent versatility of the Operator's and Assistant's consoles.

60 second changeover from left- to right-side delivery, or vice versa requires no tools or expertise. The simple procedure results in identical conditions for left- and right-handed Operators.

Rear cover is easily removed/replaced without tools or expertise

Right-handed set up.
Raise chair height and remove the rear cover.

Incline chair.
1-2. Swing table round to left side.

3-4. Swing cuspidor round to right side.

5. Secure cuspidor in position. Secure cuspidor locking lever.
2. Rotate console.
Left-handed set up.

tbCompass 'Flexible' treatment centres :

Flexible configurations to suit any Practice and procedure.

Considered flexibility of instrument configuration to fulfil individual preferences.

tbCompass 'FLEXIBLE CUSPIDOR SYSTEM'

Rotating armrests

Upholstery colour options

tbCompass Flexible Systems offer surgeries the versatility of an ambidextrous Operator's console or cuspidor with the tbCompass chair.

Both systems provide unobstructed access to accommodate your existing surgery architecture or preferred working style.

Height-adjustable Assistant's console is available

Operator's console rotates smoothly on a base-mounted arm designed for precise and balanced positioning

tbCompass 'FLEXIBLE Dr SYSTEM'

Removable rubber mat

Twin-axis headrest and ultra-slim backrest significantly improve Operator's working comfort

Central pivot design enables unobstructed access at any working position

520mm min. seat height / 820mm max. seat height

tailored options :

tbCOMPASS

Operator's control panel includes instrument, chair, spittoon and light/call nurse controls. Additionally includes preset micro-motor to run torque control with Auto-Reverse, and 2 fibre-optic Turbine hoses

Height-adjustable Assistant's console

Ambidextrous cuspidor with rotating and detachable porcelain spittoon bowl. Spittoon bowl colour options: porcelain or clear/blue/green/pink glass.
